

**For Immediate Release**

### **FIRST TRAIN LOADED**

Lexington, KY, USA, Tuesday 11<sup>th</sup> May, 2021 – **Coking Coal Pty Ltd** subsidiary, Coking Coal LLC, today announces loading of its first train of metallurgical coal.

Ty Zehir, Chief Marketing Officer – Technical and Commercial, commented: *“We are very excited to start delivering cargos of metallurgical coal to international steel mills. Another train will be loaded in the coming days, with the coal again bound for an export customer. Additional trial cargos are being discussed with Atlantic and Asian steel makers for deliveries later this year”.*

Coking Coal is recommissioning the Pardee hard coking coal complex with plans to sell 3.5mtpa of hard coking coals to steel mills in the USA, Canada, Europe, South America and Asia.

First coal deliveries were for CCL’s Black Bear Premium HVB product with the following typical specs: 7.0% ash, 0.80% S, 36.0% VM, 30,000 ddpm fluidity, 120 – 140 ARNU, 7 FSI, 0.90 - 0.95 reflectance, 0 x 50mm sizing.
